SHIVA SHARMA

8799780742 | shiva.sharma5509@gmail.com | GitHub | LinkedIn | LeetCode

PROFESSIONAL SUMMARY

B.Tech Computer Science student focused on AI/LLM application development, backend engineering, and Data Structures & Algorithms. Hands-on experience with Python, C++, FastAPI, LLM APIs, PDF parsing, Pydantic, RAG concepts, Qdrant, SQL and Git/GitHub. Actively builds practical AI projects and solves interview-oriented programming problems.

EDUCATION

B.Tech — Computer Science Engineering — **2025 – Present**
JIMS Engineering Management Technical Campus — CGPA: 7.34 (2 semesters)

Class XII — **94%**
Govt. Sarvodaya Boys Senior Secondary School

Class X — **81%**
Govt. Sarvodaya Boys Senior Secondary School

TECHNICAL SKILLS

Languages: Python, C++
AI / LLM: LLM APIs, Prompt Engineering, RAG, Embeddings, Vector Databases, Qdrant
Backend: FastAPI, Pydantic, REST APIs
Data / Documents: SQL, JSON, PDF parsing with PyPDF
DSA: Arrays, Searching, Two Pointers, Kadane's Algorithm, Linked Lists, problem-solving patterns
Tools: Git, GitHub, VS Code, Python virtual environments
Web: HTML, CSS

PROJECTS

HireMe AI — AI Resume & HR Interview Assistant

- Built a FastAPI backend that extracts text from a resume PDF and uses an LLM to convert unstructured resume content into a structured Pydantic Resume model.
- Implemented separate Resume and Experience schemas, JSON-structured LLM output, and validation using Pydantic.
- Built an AI candidate assistant that answers HR questions using parsed resume context while avoiding unsupported information.
- Integrated Groq LLM API, PyPDF, FastAPI endpoints, environment-based API-key handling, and Swagger/OpenAPI testing.

AI Resume Analyzer

- Built an AI-based resume analysis project for extracting and organizing candidate information from unstructured resumes.
- Worked with LLM-based information extraction, structured outputs, and resume-focused prompting.

RAG / LLM Projects & Practice

- Practiced the RAG pipeline: document ingestion, text processing, embeddings, vector storage/retrieval, and LLM response generation.
- Worked with Qdrant as a vector database and retrieval-based prompting to ground LLM responses in external information.

DSA & PROBLEM SOLVING

40+ LeetCode problems solved, with practice in arrays, two-pointer techniques, Kadane's algorithm, linked lists, searching and common interview patterns. Maintains coding/learning work on GitHub.

CERTIFICATIONS

- **Artificial Intelligence Fundamentals** — IBM
- **Python** — Kaggle
- **SQL** — HackerRank

ADDITIONAL

Languages: English, Hindi **Graduation:** Expected 2029
